The World's Most Powerful Construction Accounting Solution

Benefit Breakdown

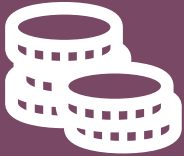

AIA Invoicing & Schedule of Values

- AIA Invoicing provided by percent of completion, milestone billing, or setting a quantity on line items
- Print output for payment and continuation straight out of Invoices or Projects
- Export and manipulate Excel format AIA invoices

Change Order Management

- Reject, request, modify, and approve directly within NetSuite
- Utilize DocuSign and instantly store in NetSuite
- Manually override requests
- Utilize on a project level or sales order level

Retainage Management

- Manage unbilled receivables
- Collect by user preferences at the Sales Order, Invoice, or Project level
- Automatically calculate remaining retainage for partial claims

Revenue Recognition

- Automatically calculate revenue based on activity codes
- Choose between labor only or labor and materials
- Utilize Project Percent Complete Override via Advanced Revenue Management (ARM)
- Keep track of Percent Complete Override changes
