Tariff Management

Description

The Tariff Management accelerator of the ScaleNorth Platform allows you to easily manage changing tariffs through automatic application of tariffs to landed costs and sales transactions.

Features

▲ Ability to apply and track tariffs from the landed costs to the sales transaction.

▲ Dynamic application of tariffs when effective dates align with item receipt or sales dates.

▲ Apply tariffs to products based on percentages, flat rates, effective dates and more.

▲ Display a "Tariff Surcharge" line item on customer invoices.

▲ Turn tariff charges on or off for specific vendors, to be customized to your compliance needs.

▲ Validation to prevent creation of new tariff records if the submitted start and end dates overlap with an existing tariff record in use for that item.

▲ Dashboard to show a list of all tariff records .

Benefits

▲ Easily manage tariffs, even when dynamically changing.

▲ Improve customer service with tariff surcharges clearly laid out.

▲ Prevent over/undercharging or misreporting on tariffs.

▲ Customizable to fit your unique business needs.
