

AI Accelerator

Description

The AI Accelerator allows you to query NetSuite data and even perform operational tasks in NetSuite, by simply typing natural language prompts into the AI engine of your choice.

Features

- ▲ Query NetSuite data with natural language questions like “What is my current Days Sales Outstanding” or “How many new clients did we gain in 2025 compared to 2024?”
- ▲ Perform operational tasks in NetSuite such as “Increase the credit limit of Customer X by 20%” or “Create a lead for ABC Company, and assign Jane as the sales rep.”
- ▲ Utilize the AI engine’s intelligence capabilities for things like forecasting and analysis of your data.
- ▲ Get detailed answers directly in the AI engine, including charts, graphs, downloadable CSV files, reasoning behind the conclusions and more.

Benefits

Simplicity

Ability to run complex NetSuite reporting and processes without the need for any NetSuite knowhow.

Efficiency

By using natural language and letting AI handle the rest, it’s like having a NetSuite consultant always by your side.

Transparency

You’ll enjoy detailed explanations of how the AI engine reached its conclusion, the data it pulled, and the methods it used.
